Purification Chambers

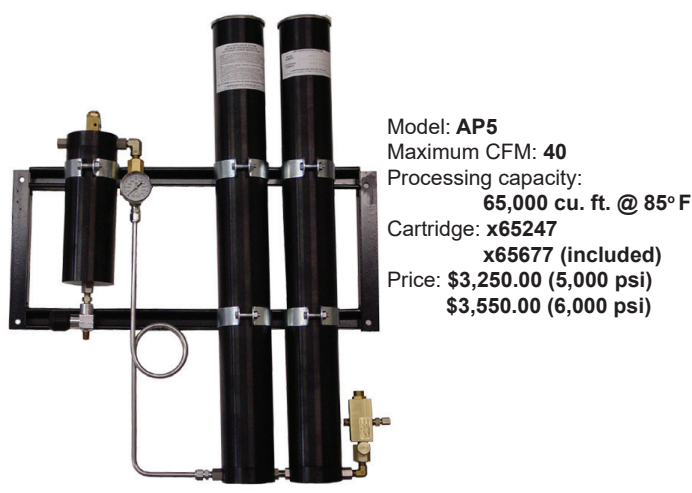

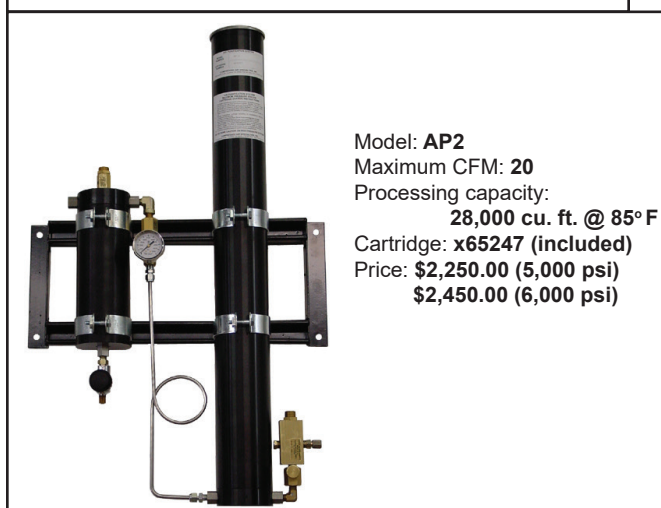

Purification Systems

COMPRESSED AIR SPECIALTIES, INC.

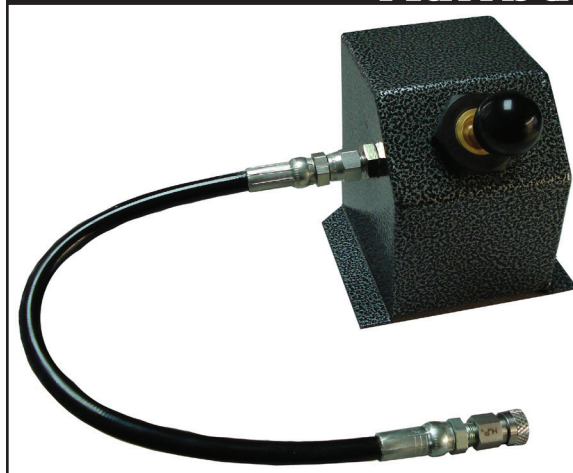

Our basic purification systems are designed to produce clean, dry, grade 'E' breathing air from any high pressure compressor. All components are rated for 5,000 psi or 6,000 psi service with a 4 to 1 safety factor. All systems feature Lawrence Factor disposable purification cartridges. These systems are complete and ready to go, just bolt them to the wall and connect them to your system.

- Systems include:
- Aluminum 60:61 T6 chambers
 - Stainless steel tubing
 - Safety relief valve
 - Final stage moisture separator
 - Stainless steel rain cap
 - Powder coated wall mount bracket
 - Check valve
 - Moisture separator drain valve
 - Bleed valve
 - Pressure gauge
 - Purification cartridges
 - Priority valve (back pressure regulator)
